PROFESSIONAL SUMMARY

Results-driven Production Support Engineer with over 4 years of experience managing and optimizing mission-critical FinTech platforms and high-volume payment infrastructure. Deep technical expertise in Volante Designer, ISO 20022 payment flows, Java, SQL, and REST APIs. Proven track record of safeguarding strict SLAs for global banking clients by driving rapid root cause analysis (RCA) and resolving high-severity production incidents. Adept at managing end-to-end release validation, application monitoring, and high-touch customer coordination in fast-paced production environments.

PROFESSIONAL EXPERIENCE

Volante Technologies - Chennai, Tamil Nadu

Production Support Engineer | September 2022 – Present

- Resolved complex production issues across banking and payment systems, minimizing downtime and ensuring uninterrupted services for 265+ banking clients.
- Investigate and resolve high-priority production incidents using log analysis, SQL queries, and code-level debugging, ensuring strict SLA adherence.
- Perform root cause analysis (RCA) for recurring production issues and collaborate with engineering teams to implement permanent fixes, significantly reducing repeat incidents.
- Validate patches, bug fixes, and new releases through manual and automation testing, achieving a 96%+ defect detection efficiency before production rollout.
- Actively involved in REST API, Maven, Jenkins, and CI/CD pipelines to support deployments and hotfixes.
- Actively involved in payment message analysis and issue resolution related to ISO 20022 / XML-based messages.
- Streamlined incident and change management processes using ServiceNow and JIRA, enabling faster issue resolution and improved customer engagement.
- Create and maintain support documentation, runbooks, and SOPs, improving operational efficiency and on-boarding speed.
- Conduct knowledge transfer and training sessions on production best practices and platform usage.

Testyantra - Bangalore, Karnataka

Associate Software Engineer | February 2022 - August 2022

- Built strong foundations in Core Java and SQL, solving real-world problem statements during enterprise-focused training.
- Actively involved in manual and automation testing, gaining hands-on experience with Selenium and Cucumber (Gherkin).
- Executed database validations with high accuracy, ensuring data consistency across application layers.
- Participated in code reviews and CI processes, following clean coding and testing standards.

TECHNICAL SKILLS

- **Languages:** Java, SQL, Python, HTML
- **Payments & FinTech:** Volante Designer, Payment Message Processing
- **Testing:** Manual Testing, Automation Testing (Selenium, Cucumber-Gherkin)
- **Tools:** REST APIs, Maven, Jenkins, ServiceNow, JIRA
- **Production Support:** Incident Management, RCA, Log Analysis, Release Validation
- **DevOps & Platforms:** Kubernetes, CI/CD
- **Operating System:** Linux, Windows, macOS
- **Methodologies:** Agile / Scrum

PROJECTS

Volante Designer - Production Support

- Supported clients in troubleshooting payment message validation and transformation issues.
- Analyzed complex Payment Processing Message structures and assisted in resolving platform-specific and configuration issues.
- Coordinated with internal teams to ensure smooth releases and minimal production downtime.

VAPI

- Led the transformation of inbound and outbound transactions through Volante VAPI.
- Facilitated efficient communication between internal teams and clients, ensuring seamless information flow.
- Acted to resolve API integration and data flow issues.

EDUCATION

B.E. - Basaveshwar Engineering College

CGPA: 8.43 | 2020

CERTIFICATIONS AND NOTABLE ACHIEVEMENTS

- Advanced SQL Certification.
- Certified in Information & Cyber-Security, applied concepts in real-world project scenarios.
- Led the college robotics club, organizing weekly workshops on Technical analysis and Customer relationship management, resulting in a 75% increase in club membership.

LANGUAGES

English, Kannada, Hindi, Tamil.
